

Gurdeep Singh

Lead Engineer Devops

-  gurdeep.67ece15@gmail.com
-  +917006174906
-  Srinagar, Jammu & Kashmir, India , 190001

CAREER OBJECTIVE

To lead and optimize cloud-native infrastructure and DevOps practices in a high-impact environment, enabling scalable, secure, and efficient software delivery while driving innovation in Cloud and AI-driven automation.

PROFILE

WORK HISTORY

Freechargebiz (formerly freecharge)02/2024 – Present

Lead Devops Engineer

Axis Bank – ChargeNex (Client Project)

- Architected and deployed a production-grade AWS EKS platform from scratch, including VPC design, node group configuration, and cluster hardening.
- Managed microservices infrastructure on Kubernetes using Istio for traffic management, observability, and mTLS security.
- Implemented event-driven architecture using Apache Kafka and orchestrated data pipelines with Airflow and EMR on EKS.
- Owned end-to-end cloud infrastructure, ensuring high availability, scalability, and security for a mission-critical banking platform.
- Led cloud cost optimization initiatives through tagging, right-sizing, and reserved instance planning reducing monthly AWS spend by 20%.

FreechargeBiz Platform (Internal Product Infrastructure & DevOps Leadership)

- Led DevOps initiatives for the FreechargeBiz platform, driving infrastructure reliability, scalability, and modernization.
- Mentored team members on Kubernetes, cloud best practices, and infrastructure operations.
- Spearheaded infrastructure upgrades, OS/application patching, and migration strategies across environments.
- Introduced DevSecOps practices into CI/CD pipelines, integrating SAST, dependency scanning, and container security checks.
- Exploring secure deployment of LLM/SLM models on private infrastructure to enable enterprise AI capabilities.
- Architected and deployed an AI-powered FinOps platform to monitor, analyze, and optimize multi-cluster Kubernetes and AWS infrastructure costs, utilizing **GitHub Copilot** to accelerate the development lifecycle and used Litellm for budget control and governance
- Designed a generative AI recommendation engine leveraging AWS Bedrock (Anthropic Claude) to analyze complex cloud utilization patterns and generate actionable, context-aware cost-reduction strategies.

Nykaa

09/2021 – 02/2024

Devops Engineer

- Managed and scaled AWS infrastructure across services including EC2, S3, RDS, VPC, EKS, ECS, Route 53, and CloudFront to support high-traffic e-commerce workloads.
- Designed and maintained CI/CD pipelines using Jenkins and shared library, improving deployment efficiency and reducing manual intervention.
- Built and managed containerized applications using Docker and Kubernetes, enabling scalable and resilient microservices architecture.
- Implemented Infrastructure as Code (IaC) using Terraform and Chef to standardize.
- Developed automation scripts in Python to eliminate repetitive tasks.
- Deployed and monitored observability stacks using EFK, Grafana, and New Relic for real-time logging, monitoring, and alerting.
- Integrated API gateway and caching solutions using Kong and Varnish to enhance performance and traffic management.
- Strengthened security posture by implementing WAF protection using Cloudflare.
- Collaborated with development and QA teams to design scalable, high-performance systems aligned with business requirements.

Valuefirst, a Twilio company

11/2019 – 09/2021

TechOps Engineer

- Managed Linux-based production environments, ensuring system stability, performance, and uptime.
- Administered Mysql, MongoDB
- Automated routine operational tasks using Shell/Bash scripting and Ansible, improving efficiency and reducing manual effort.
- Deployed and maintained applications across environments, ensuring smooth release and minimal downtime.
- Monitored infrastructure and application health using Site24x7 enabling proactive issue detection and resolution.
- Supported Active disaster recovery (DR) planning and execution to ensure business continuity and data protection. Automated the DR switch in case of any issues.
- Led coordination and execution of an internal project Infinito, ensuring timely delivery through effective planning and stakeholder communication.

TECHNICAL SKILLS

Cloud & Infrastructure:

AWS (EC2, S3, RDS, VPC, EKS, ECS, Route 53, CloudFront)

Containerization & Orchestration

Docker, Kubernetes (EKS), Istio

Infrastructure as Code & Configuration Management

Terraform, Ansible, Chef

CI/CD & DevSecOps

Jenkins, Git, Devtron, SAST, Dependency Scanning, Container Security

Monitoring & Observability

Grafana, EFK Stack (Elasticsearch, Fluentd, Kibana), New Relic, Site24x7

Operating Systems & Networking

Linux (Advanced), Windows (Basic), Nginx, Apache, Load Balancing, SSL/TLS

Databases & Messaging

MySQL, MongoDB, Redis, Elasticsearch, Apache Kafka (MSK)

Scripting & Automation

Shell/Bash, Python

Other Tools

JIRA, Rundeck, PM2, Cloudflare, Hashicorp Vault

Generative AI Platforms

AWS Bedrock (Anthropic Claude), OpenAI API, GitHub Copilot , AWS Kiro

AI Safety & Governance

LiteLLM

EDUCATIONAL QUALIFICATION

B.E. in Electronics & Communication Engineering (ECE)

2015 – 2019

Model Institute of Engineering and Model Institute of Engineering and Technology, Jammu University, Jammu

65.00% Aggregate
